

Task Reminder

A calm, Pokémon-themed to-do list that reminds you before things are due.

User guide · Android app & web

1 Install the app

On Android (Android 7 or newer):

1. Make sure **Google Chrome** is installed. The app runs on Chrome, even if another browser is your default. Without Chrome, reminders won't work.
2. Open the APK file you were sent, or download the newest one here:
github.com/Ansh-mick27/task-reminder-app/releases/latest/download/task-reminder.apk
3. If Android asks, allow installing apps from this source (your browser or file manager), then tap **Install**.
4. Open **Task Reminder** from your home screen.

On any computer or phone browser, go to

<https://task-reminder-f7a06.web.app>

Updates: most updates arrive on their own the next time you open the app. You only need to install a new APK if you're told to.

2 Sign in with Google

Tap **Sign in with Google** and choose your account.

- Your tasks are saved to your Google account, so they're there every time you sign in, on any device.
- Only you can see your tasks. Each person who signs in gets their own private list.
- Your list also opens without internet; changes sync when you're back online.

Task Reminder

Gotta catch 'em all... your tasks, that is.

 Sign in with Google

Sign-in screen

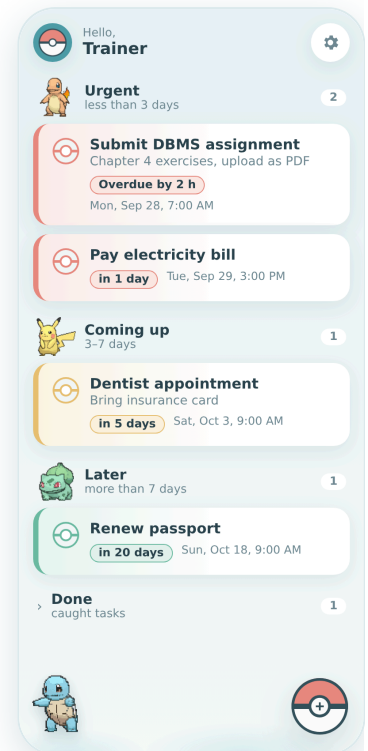

3 Your tasks at a glance

Every task is colored by how soon it's due. **Red tasks always stay at the top**, and colors update on their own as time passes.

Each card shows the time left (for example *in 1 day* or *Overdue by 2 h*) and the exact due date and time.

Squirtle, in the bottom-left corner, is your buddy. Tap it for a little encouragement.

Task list

4 Add, edit and complete tasks

Add a task

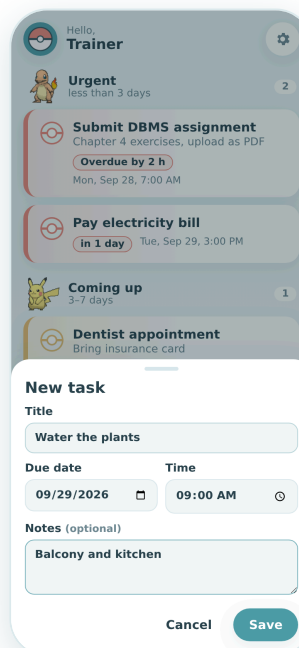

Tap the **Poké Ball +** button (bottom right). Enter a **title**, the **due date and time**, and optional **notes**, then tap **Save**.

Edit or delete

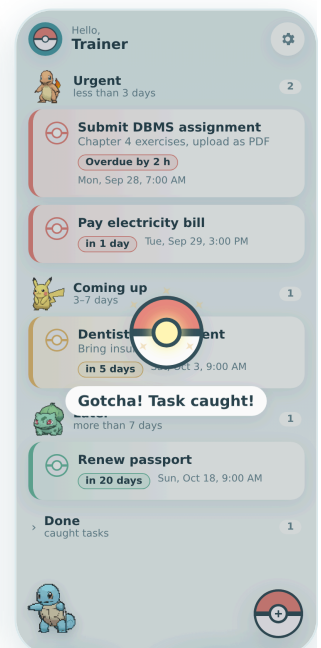

Tap a task card to change it. To remove it, tap **Delete** in the same screen.

Mark as done

Tap the small ball on the left of a task. A Poké Ball catches it 🏆 and the task moves to the **Done** list at the bottom. Tap **Done** to show or hide it. To reopen a finished task, tap its ball again.

New task

Task caught!

5 Turn on reminders

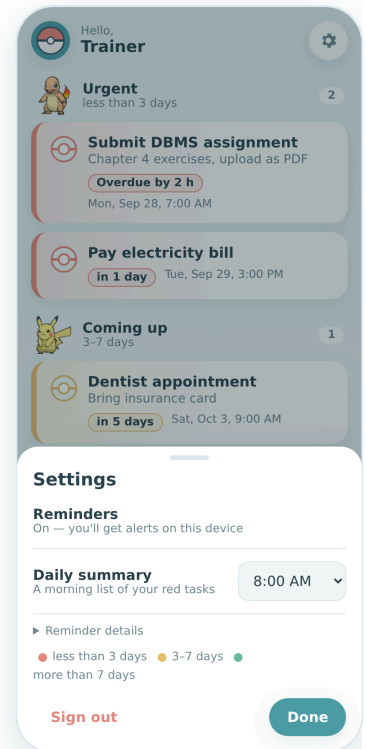

The first time you open the app, tap **Enable** on the banner (or in **Settings** ⚙️) and choose **Allow**. Do this once on each phone or computer where you want alerts.

🔴 Turns urgent	when a task has less than 3 days left
🔥 Due tomorrow	1 day before the due time
🕒 Due now	at the due time
☀️ Daily summary	every morning, a list of your red tasks (8:00 AM by default)

Reminders are checked about every 10 minutes, so an alert can arrive a few minutes after the exact time.

Settings ⚙️

- **Reminders:** shows whether alerts are on for this device.
- **Daily summary:** pick the time, or choose **Off**.
- **Sign out:** stops alerts on this device.

Settings

6 If something isn't working

No notifications arrive

- Open **Settings** ⚙️ in the app. It should say "**On — you'll get alerts on this device**". If not, tap **Enable**.
- Check **Android Settings** → **Apps** → **Task Reminder** → **Notifications** is turned on.
- Make sure **Google Chrome** is installed and up to date.
- Battery savers can delay alerts. If they're late, allow Chrome to run in the background.

"Chrome is blocking notifications for this app"

Open **Chrome**, go to **task-reminder-f7a06.web.app**, tap the icon left of the address → **Permissions** → **Notifications** → **Allow**. Then close and reopen the app and tap **Enable** again.

Still stuck?

In **Settings** ⚙️, tap **Reminder details** and send a screenshot of it to whoever shared the app with you. It shows exactly what's going wrong.

Task Reminder is a personal project, shared for personal use and not published on an app store. Pokémon and Pokémon character names are trademarks of Nintendo, Game Freak and The Pokémon Company; sprites come from the open PokeAPI project.
